## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 21 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-27 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-27 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 7, 16, 10-13 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Crane et al., U.S. Pat. No. 6,510,236 B1, hereinafter '236.

As to claims 1-4, 7, 16, and 10-13, '236 teaches the claimed invention of an authentication framework for managing authentication request comprising: a compute program product for use with biometrics, a pervasive device, capturing biometric data, a third party/user, a reader, means for identifying by comparing stored data, capturing biometric data, transmitting, retrieving, and returning information/authentication token, access rights/tokens, locally stored data, and a photograph {biometrics, picture/scan of finger, palm, eye etc}, and a remote server, a trusted application server, (abs., figs. 1-4, col. 1, lines 45 et seq., col. 2, lines 20 et seq., col. 3, lines 8-13, 29-32, and 47-67, col. 4, lines 25 et seq., col. 5, lines 1-40, claim 23, col. 6, line 25 et seq.).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-6, 14-15, 8-9, 17-18, and 19-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over '236 as applied to claims 1-4, 7, 16, and 10-13 above, and further in view of Maes et al., U.S. Pat. No. 6,016,476, hereinafter '476.

5. As to claim 5-6, and 14-15, '236 do not explicitly teach the retrieval of information from a protected non-locally accessible data means, or filtered data. '476 teaches filtering and, non-locally accessible data (abs., figs. 1 and 5-6, col. 1, lines 14 et seq., col. 2, lines 24 et seq., col. 3, col. 5, lines 25 et seq., and col. 7, lines 5 et seq.) It would have been obvious to one of ordinary skill in the art at the time of the invention, to augment the invention of '236 with a means providing a portable information and transaction system utilizing biometrics as disclosed in '476. One of ordinary skill in the art would realized the advantages of not providing any additional information that may not be locally accessible on the pervasive device, within a transaction system. One of ordinary skill in the art would have been motivated to perform such a modification, because, one of ordinary skill would have had a desire not to transmit any additional personal authentication information to a device that did not possess it, as a means of safeguarding the confidentiality and integrity of one's personal data. With such a desire in mind one could not only safeguard information that a device is not purvey to, but,

Art Unit: 2134

stop the erroneous transfer of another personal information (col. 7, lines 5-10 et seq.).

'476 also recites that it may be used in a security system to access applications and systems for a device or building (col. 2, lines 50-60 et seq.), therefore, it would lends itself well to the uses described in the invention of '236.

6. As to claims 8-9, and 17-18, '236 does not explicitly teach the transmission of a trusted message or a secure meeting where the coded means is used to identify attendees at a meeting. '467 teach the use of transmitting trusted messages (col. 2, lines 23-67 et seq., col. 3, lines 15-35 et seq., and 40-67 et seq.) and, providing access to a secure building via the use of a pervasive device or code (col. 2, lines 50-58).

7. As to claims 19-27, they recite a concomitant of previously recited elements and therefore fail to distinguish over the above rejected claims, accordingly, they are rejected under the same rationale, see above.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
